

# NitroMKP<sup>™</sup>

## WATER SOLUBLE MONO POTASSIUM PHOSPHATE

PHOSPHORUS (P) 22.7%  
POTASSIUM (K) 28.2 %

NitroMKP<sup>™</sup> is a fully water soluble fertiliser comprising Potassium and Phosphorus, recommended for vegetables, fruits, vines, flowers, turf and ornamentals. NitroMKP<sup>™</sup> is the most readily available fertiliser form of Potassium and Phosphorus available. As a Nitrogen free fertiliser, NitroMKP<sup>™</sup> is the preferred source of Phosphorus and Potassium when Nitrogen should be limited.

NitroMKP<sup>™</sup> is suitable for application via irrigation systems in any growing medium, and for hydroponic systems where a quick response is required. It dissolves rapidly and completely and remains in solution ready for root adsorption or is taken in via leaf surfaces.

Before application, seek advice from your supplier or local agronomist.
